Solitario Diamonds – Website Design Plan (Home, Products & About Us)

Brand Essence & Positioning

- **Luxury & Modern Consciousness:** Solitario positions itself as a **"new-age diamond jewellery brand"** where luxury is sustainable. The brand's story emphasises timeless, sustainable luxury that leaves a positive footprint for future generations [1]. This ethos should inform all narratives and visuals.
- **Accessible yet Exclusive:** The brand aims to make diamonds accessible without compromising exclusivity. Their vision flips the traditional narrative by making ethically crafted pieces accessible to all [2].
- **Mission:** To deliver jewellery that "doesn't cost the Earth" [3]. Use subtle references to environmental responsibility throughout the site (e.g., icons, copy, imagery).

Visual Identity

Element	Details & Usage
Logo	Use the supplied Solitario wordmark with the geometric diamond icon. Keep adequate clear space around it, and use the white version on dark backgrounds and the coloured version on light backgrounds.
Primary Colours	Four sophisticated shades:
- **Dark Teal Green** `#146552` (Pantone 560 C) – rich base colour.	
- **Classic Bronze** `#ac884b` (Pantone P 12-6 C) – golden highlight.	
- **Copper Rose** `#c39275` (Pantone P 42-2 C) – subtle warm accent.	
- **Ivory Pearl** `#f8eee7` (Pantone 75-9 C) – light, luxurious neutral.	
Secondary Colours	Accent colours: **Gold**, **Green** and **Teal**. A key secondary colour is `#107571` (Pantone green). Use sparingly for call-to-action elements, hover states and icons.
Typography	

Element	Details & Usage
- **Headlines: Aguila** – a modern typeface with straight lines and sharp curves that evoke luxury and confidence.	
- **Body & Sub-headings: Montserrat** – clean, elegant and highly legible. Use different weights (Thin, Regular, Bold, Black) for hierarchy.	
Imagery	Use high-quality photographs of jewellery, hands wearing pieces, and aspirational lifestyle shots. Select images that align with the color palette: warm neutrals, dark backgrounds and subtle highlights.
Iconography	Use simple line icons (matching the weight of Montserrat) for representing values like sustainability, certification, craftsmanship and bespoke services.

Page-by-Page Structure & Content

1. Home Page

Hero section - Use a **full-bleed dark background** (preferably Dark Teal Green) with the Solitario logo at the top left and a minimalist navigation (Home, Products, About Us, Cart).
- Create a **scroll-triggered or timed text reveal**: three statements appear one after another (e.g., “Timeless sustainable luxury,” “Cherished heirlooms for modern generations,” “Diamonds reimagined for the conscious you”). Between each text reveal, cross-fade in high-resolution jewellery imagery. Keep the text in Aguila for impact.
- Place a clear **call to action** button such as “Explore Collections” or “Discover More,” styled with bronze (#ac884b) over Ivory Pearl background or vice versa.

Our Promise / Brand Story snippet - Include a short introduction: “Designed for today. Inspired by tomorrow.” Expand with a concise statement about leaving a positive footprint and crafting heirloom pieces [1]. Use Montserrat for this text. Link to the full About page.

Product Categories - Display four categories (Rings, Necklaces, Earrings, Bracelets). Use a 2x2 grid on Ivory Pearl or very light background. Each tile shows a product image, category title, and sample price (use demo details from the existing website). On hover, overlay a bronze tint and show a “View” button.

Luxury Reimagined / Lab-Grown Diamonds - Add a section summarising the benefits of lab-grown diamonds: emphasise that they are all the beauty “minus the baggage” and are “the elegant evolution of fine jewellery” [4]. Use icon cards for “Sensual,” “Sustainable,” and “Smart.”
- Provide a link to the catalogue if you’d like a downloadable brochure (optional). Use a bronze button on Ivory background for the link.

Awards & Recognition - Use a horizontal timeline or vertical list to display key awards (e.g., Italian Palladio Awards, International Jewellery Design Excellence Award, Luxury Jewellery Craftsmanship Award, Global Diamond Excellence Award). Display the year (e.g., 2022) and a one-sentence description for each.

Testimonials & Reviews - Add a carousel with a customer quote (e.g., “So happy for stunningly beautiful and aesthetic designs”), star rating (e.g., 4.8/5) and a photo of a customer wearing the jewellery. Make the testimonial area Ivory Pearl with bronze stars for contrast.

FAQ / Sustainability & Ethics - Include a mini FAQ with the top 3–4 questions (e.g., “Are your diamonds ethically sourced?” “Do you offer custom/bespoke services?” etc.) and short answers. - Use an accordion component on an Ivory or dark section with bronze highlight lines.

Footer - Use the dark teal background with Ivory Pearl type. Include navigation links, social icons, subscription form (email input and subscribe button), and brand tagline. Add credits (“© 2025 Solitario. All rights reserved.”).

2. Products Page

Hero Section - Use a simple hero banner with a captivating product photo (e.g., a ring or necklace on a dark background) and the headline “Discover the Sparkle” or similar.
- Include breadcrumb navigation or subheading (“Home > Products”).

Product Grid - Display products in a clean grid. Each card should include: - Product image. - Name (e.g., “Classic Solitaire Ring”). - Price (e.g., “₹16,600”). - Quick-add or Quick-view icon (plus sign). When clicked, either add to cart or show a modal with more details. - Use category filter tabs (All, Rings, Necklaces, Earrings, Bracelets, Customized) with the active tab highlighted in bronze. When a tab is selected, filter the grid accordingly (for demos, reuse products across categories).
- Use Ivory or very light backgrounds for product cards with subtle shadows; apply bronze for interactive states (hover, active).

Product Details Modal (optional) - If Cursor AI supports modals, display a pop-up with enlarged image, product description, material details, price, and an “Add to Cart” button.

3. About Us Page

Introduction - Start with a hero banner containing a founder portrait or creative shot of artisans working on jewellery. Add a headline like “Designed for today. Inspired by tomorrow.” followed by a tagline summarising the mission: “Crafting heirlooms for modern and future generations” [1].

Our Story - Expand on how Solitario saw an opportunity when customers asked for timeless sustainable luxury and how the brand aims to leave a positive footprint [1]. Write the narrative in short paragraphs with supporting imagery (e.g., lab environment, artisans at work). Include callouts or pull quotes.

Vision & Mission - Separate sections for Vision and Mission: - **Vision:** “Flip the script—diamonds aren’t exclusive indulgences but accessible luxury” [2]. Describe how ethically crafted, tastefully designed pieces become an extension of one’s personality. - **Mission:** “We bling better. Our jewellery doesn’t cost the

Earth” [3]. Explain sustainable practices, lab-grown diamonds, and social responsibility. - Use bronze icons for each value or statement.

Founders & Team - Present photos and short bios of co-founders (Ricky Vasandani & Dr. Vivek Anand Oberoi) and core team members. Use a consistent card layout with a headshot, name, title, and succinct biography. Keep the section on an Ivory background with bronze accents.

The Promise - Summarise service promises (e.g., Bespoke Designs, Lifetime Buy-back, IGI Certificates, Hallmarked Gold, Loyalty Club). Represent each with an icon and short description.

Call-to-Action - End with a strong CTA encouraging visitors to explore collections or sign up for a newsletter. Use a high-contrast bronze button on a dark background to stand out.

Implementation & Interaction Considerations

- **Typography Implementation:** Load Aguila and Montserrat fonts via CSS using `@font-face` declarations or external services (e.g., Google Fonts for Montserrat). Ensure fallback fonts (e.g., sans-serif) are defined.
- **Colour Usage:** Use dark teal or black backgrounds for high-impact sections (hero, footer) and light Ivory backgrounds for content sections to create contrast and maintain a luxurious feel. Bronze and copper tones should be used sparingly as highlights.
- **Animations:** Keep animations subtle. Scroll-triggered text reveals and cross-fades should last ~1.5–2 seconds to avoid overwhelming users. Use fade or slide transitions for product card hover effects.
- **Responsive Design:** Ensure layouts adapt seamlessly across devices. For mobile, the product grid should become a single column; the hero text should stack; navigation becomes a hamburger menu. Keep the text legible with appropriate scaling.
- **Accessibility:** Maintain high colour contrast; provide alt text for images; ensure keyboard navigation for interactive elements (filter tabs, carousels, modals).

Using Demo Content

- **Products:** Extract names, descriptions and prices from the existing Solitario website as demos (e.g., Classic Solitaire Ring, Diamond Teardrop Necklace, Gold Plated Ring etc.). Use placeholder images if product photos aren’t available.
- **Copy:** Reuse and adapt relevant passages from Solitario’s website (mission, sustainability, awards, values). Keep paragraphs concise and break up text with headings and bullet lists.

Next Steps

1. **Gather Assets:** Collect high-resolution product photos and lifestyle images, icons consistent with the brand style, and confirm the tagline script for the hero section.
2. **Design Wireframes:** Sketch the layout of each page (Home, Products, About) following the structure above.
3. **Develop in Cursor AI:** Implement the pages using the curated colours, fonts and layout. Use CSS for styling and transitions, ensuring cross-browser compatibility.

4. **Populate Demo Content:** Insert product information and copy from Solitario's existing site. Adjust placeholder content later once final assets and copy are ready.

With this plan, the Solitario website will convey a luxurious, sustainable, and modern brand experience while staying aligned with the provided guidelines and reference designs.
