1. Product Overview

The Solitario is a premium lab-grown diamond jewellery e-commerce platform built on a modern headless architecture. It serves customers across India with 220+ curated jewellery products spanning rings, earrings, necklaces, bracelets, and collectibles. The platform integrates best-in-class third-party services to deliver a seamless shopping experience from discovery through delivery.

> *Domain: thesolitario.com | Stack: Next.js 15 · TypeScript · Shopify · Clerk · Razorpay · Delhivery · Vercel*

1.1 Product Goals

- Deliver a premium, brand-consistent shopping experience for lab-grown diamond jewellery
- Support end-to-end e-commerce: browsing → cart → payment → shipping → delivery confirmation
- Enable strong conversion through promotions, AI-assisted search, and frictionless checkout
- Provide real-time inventory, pricing, and logistics powered by Shopify and Delhivery
- Empower administrators with a full-featured back-office panel for orders, coupons, and analytics

1.2 Target Audience

Segment	Description
End Customers	Indian consumers purchasing lab-grown diamond jewellery online
Guest Shoppers	Unregistered users browsing and completing checkout
Registered Users	Logged-in customers with wishlist, order history, and loyalty benefits
Admins / Operators	Internal team managing orders, products, promotions, and customers
Brand Partners	Warner Bros collaboration — DC Comics & Tom & Jerry collectibles buyers

2. Tech Stack & Architecture

2.1 Core Framework

Layer	Technology
Framework	Next.js 15 (App Router, React 19)
Language	TypeScript
Styling	Vanilla CSS + TailwindCSS
Hosting	Vercel (Production + Preview environments)
Package Manager	npm

2.2 Backend / Headless Commerce

Service	Role
Shopify Storefront API v2025-01	Product catalog, collections, cart, pricing
Shopify Admin API v2025-01	Order management, discount codes, customer sync, product mutations
Shopify Metaobjects	Dynamic content — hero banners, shop hero sections
Shopify Metafields	Product-level metadata — specifications, reviews

2.3 Authentication

Service	Role
Clerk v6	Authentication (Google OAuth + Email/Password), session management, middleware
Shopify Customer API	Customer account sync — auto-created for OAuth users

2.4 Payments & Logistics

Service	Role
Razorpay	Payment gateway — UPI, cards, netbanking, wallets (INR)
Razorpay Webhooks	Payment verification and signature validation
Delhivery API	Shipment creation, tracking, pincode serviceability, ETA, COD check, label generation

2.5 Data Layer

Service	Role
JSON File Storage	Users, orders, coupons stored on local file system
Supabase	Additional data persistence layer
SessionStorage	Scroll position and navigation state
React Query (TanStack Query)	Client-side caching, deduplication, stale-while-revalidate

2.6 Analytics & Marketing

Service	Role
Google Analytics 4	Page views and e-commerce event tracking
Meta Pixel (Facebook)	Conversion tracking and retargeting
Google Ads	Ad conversion tracking
PostHog	Product analytics and feature flags
Vercel Speed Insights	Core Web Vitals monitoring

2.7 Email & AI

Service	Role
Resend	Transactional emails — order confirmation, shipping, delivery confirmation
Google Gemini	AI chatbot, image generation (Imagen 4), brand-consistent content

3. Frontend Pages & UX

3.1 Public Pages

Page	Route	Description
Home	/	Hero slider, shop by category, brand story, testimonials, product categories, FAQ, store locator, DC banner slider
Shop (All Products)	/products	220+ products, sidebar filters, sort, infinite scroll, quick view modal
Category Pages	/products/category/[slug]	Category-filtered products — rings, earrings, necklaces, bracelets, jewellery
Product Detail (PDP)	/products/[id]	Image gallery, specs, pricing, add to cart, Buy 2 Get 1 badge, related products, JSON-LD schema
Warner Bros Collectibles	/warner-bros	DC + Tom & Jerry collaboration, dark cinematic theme, rotating hero banners
About	/about	Company story, founder bios, brand values
Contact	/contact	Contact form via EmailJS
Stores	/stores	Store locator with map, city-based listing, Google Maps
Blog	/blog	Blog articles
Lab-Grown Diamonds	/lab-grown-diamonds	Educational content about lab-grown diamond benefits
Certifications	/certifications	Diamond certification information
Sustainability	/sustainability	Sustainability initiatives
FAQ	/faq	Accordion-style frequently asked questions
Christmas Sale	/christmas-sale	Seasonal promotional page
Franchise	/franchise	Franchise enquiry page

3.2 Legal & Policy Pages

Page	Route
Privacy Policy	/privacy-policy
Terms & Conditions	/terms
Shipping Policy	/shipping
Returns & Refund Policy	/returns
Regulatory Disclosures	/regulatory-disclosures

3.3 User Account Pages (Protected)

Page	Route	Features
Account Dashboard	/account	Profile overview, quick stats
Address Book	/account/addresses	Add/edit/delete addresses, set default
Order History	/account/orders	Past orders with status and tracking
Payment Methods	/account/payment	Saved payment methods
Account Settings	/account/settings	Profile settings and preferences
Wishlist	/account/wishlist	Saved products with live price refresh

3.4 Checkout Flow Pages

Page	Route	Description
Cart	/cart	Cart with quantity management and item removal
Checkout	/checkout	Multi-step: address → payment → confirmation. Razorpay, coupons, promotions
Shop Checkout	/shop-checkout	Alternative checkout via native Shopify flow
Checkout Success	/checkout/success	Order confirmation with full order details
Checkout Failed	/checkout/failed	Payment failure handling and retry options

3.5 UX Features

Feature	Implementation
Smart Scroll Management	Forward nav scrolls to top; back nav restores scroll position via sessionStorage
React Query Caching	Products cached 5 min, shared ['products'] query key across shop and category pages
Smooth Scroll (Desktop)	Lenis smooth scrolling on desktop via SmoothScrollWrapper
Quick View Modal	Hover on product card opens quick view overlay with key details and add to cart
Infinite Scroll	IntersectionObserver for lazy loading product batches
Search Modal	Global search overlay (Ctrl+K or click icon) with live product search
Offers Marquee	Scrolling promotional banner site-wide
Cookie Consent	GDPR-compliant cookie consent banner
Breadcrumbs	Dynamic breadcrumb navigation on PDP and category pages
Error Boundaries	Graceful error handling with ProductErrorBoundary
Loading States	Skeleton and spinner UIs during data fetching
Login Popup	Triggered login modal for guest users on protected actions
Mobile Responsive	Touch-friendly filters, bottom sticky bars, mobile sort/filter modals

4. Product System

4.1 Data Source & Catalog

- Primary source: Shopify Storefront API (GraphQL)
- Product count: 220+ lab-grown diamond jewellery items
- Categories: Rings, Earrings, Necklaces, Bracelets, Jewellery

4.2 Product Features

Feature	Details
Filtering	Category, price range (₹0–₹5,00,000), featured only, search query
Sorting	Relevance, Featured First, Price Low-High, Price High-Low, Name A-Z / Z-A
View Modes	Grid view and List view toggle
Quick View	Modal overlay with product details and add to cart
Product Recommendations	Related products by category on PDP
Price Display	INR currency formatting, compare-at pricing, Buy 2 Get 1 Free badges
Gift Products	Support for gift line items in promotions

5. Authentication & User Accounts

5.1 Auth Provider: Clerk v6

Feature	Details
Email/Password	Standard signup and login with password
Google OAuth	One-click Google sign-in
Auto Shopify Sync	OAuth users automatically get a Shopify customer account created
JWT Sessions	30-day JWT sessions
Protected Routes	/account/*, /admin/*, /wishlist/*
Middleware	Clerk middleware with route matchers

5.2 Auth Flow

- User signs up via Clerk — email/password or Google OAuth
- On first sign-in, a Shopify customer is auto-created via Admin API
- Shopify customer access token is stored in session
- Protected routes check authentication via clerkMiddleware

5.3 User Account Features

- Profile Management: name, email, phone, avatar upload
- Address Book: multiple saved addresses with default selection
- Order History: past orders with status tracking and order details
- Wishlist: persisted wishlist with live price refresh from Shopify API

6. Cart & Checkout

6.1 Dual Cart System

Cart Type	Implementation
Local Cart	React Context — client-side cart state for instant UI updates
Shopify Cart	Shopify Storefront API cart — server-synced cart for checkout integrity

6.2 Cart Features

- Add and remove items
- Quantity adjustment per line item
- Cart total calculation with discounts applied
- Cart item count badge in site header
- Persistent cart state across page navigation

6.3 Checkout Flow (9 Steps)

Step	Action
1. Cart Review	View items, quantities, and subtotal
2. Address Input	Customer details and delivery address entry
3. Pincode Check	Delhivery serviceability check and ETA display
4. Coupon Code	Apply Shopify discount codes
5. Promotion Engine	Auto-apply Buy 2 Get 1 Free, first-purchase discount
6. Payment	Razorpay checkout modal (UPI, cards, netbanking, wallets)
7. Verification	Server-side payment signature verification (HMAC SHA256)
8. Order Creation	Save order to DB and send email confirmation
9. Success/Failure	Redirect to confirmation or failure page

7. Payments

7.1 Provider: Razorpay

Feature	Details
Payment Methods	UPI (default), Credit/Debit Cards, Netbanking, Wallets
Currency	INR (Indian Rupees)
Amount Handling	Paise-based — ₹100 = 10,000 paise
Signature Verification	HMAC SHA256 server-side verification
Branding	Solitario logo + brand green (#146552) checkout theme

7.2 Payment API Endpoints

Endpoint	Method	Description
/api/razorpay/create-order	POST	Create Razorpay order with amount
/api/razorpay/verify-payment	POST	Verify payment signature
/api/razorpay/webhook	POST	Payment event webhooks
/api/submit-order	POST	Final order submission after payment

7.3 Payment Flow

> *Client → Create Razorpay Order (API) → Open Razorpay Modal → User Pays → Razorpay Callback → Verify Signature (API) → Update Order Status → Send Confirmation Email → Redirect to Success Page*

8. Shipping & Logistics

8.1 Provider: Delhivery

Feature	Details
Shipment Creation	Auto-create shipments with manifest option
Real-Time Tracking	Track shipments by waybill number
Pincode Serviceability	Check delivery availability and estimated delivery time
COD Support	Cash-on-delivery availability check per pincode
Shipping Label	Auto-generate PDF shipping labels
Warehouse Config	Configurable pickup warehouse details
Shipment Cancellation	Cancel shipments via API

8.2 Shipping API Endpoints

Endpoint	Method	Description
/api/shipping/create-order	POST	Create Delhivery shipment
/api/shipping/track	GET	Track shipment by waybill
/api/shipping/check-pincode	GET	Pincode serviceability and ETA
/api/shipping/warehouses	GET	Warehouse information
/api/pincode	GET	Pincode delivery check

9. Promotions, Coupons & Discounts

9.1 Promotion Engine

Promotion Type	Description	Details
Buy 2 Get 1 Free	Cart-level rule	For every 3 items, cheapest is free. Auto-calculates across mixed cart
First Purchase Discount	20% off for new users	For logged-in users with zero paid orders. Configurable stacking
Loyalty Coupons	Per-user coupon codes	Monthly loyalty coupon generation, code-based redemption
Shopify Discount Codes	API-validated codes	Validate and apply Shopify-native discount codes via Admin API

9.2 Coupon System

- Code format: SOLI-LOYAL-XXXXX (auto-generated)
- Validation: expiry check, status check (ACTIVE / REDEEMED / EXPIRED)
- Redemption: marked as redeemed on successful use
- Per-month limit: one coupon per user per calendar month

9.3 Promotion Configuration

Config Key	Default Value	Description
first_purchase_percent	20	Discount percentage for first purchase
loyalty_coupon_percent	10	Loyalty coupon discount percentage
loyalty_coupon_validity_days	30	Number of days coupon remains valid
buy2_percent	10	Buy 2 effective discount percentage
stacking_first_purchase	false	Whether first purchase stacks with Buy 2 Get 1

10. Admin Panel

10.1 Admin Pages

Admin Page	Route	Features
Dashboard	/admin	Key metrics overview, order stats, revenue
Orders	/admin/orders	All orders list, status management, order details
Products	/admin/products	Product catalog management
Customers	/admin/customers	Customer list and details
Promotions	/admin/promotions	Coupon CRUD, promotion config
Analytics	/admin/analytics	Sales analytics, traffic data
Settings	/admin/settings	Admin preferences
Access Control	/admin/access	Admin user management

10.2 Admin API Endpoints

Endpoint	Method	Description
/api/admin/bulk-upload-products	POST	Bulk product upload to Shopify
/api/admin/create-demo-product	POST	Create test/demo product
/api/admin/update-variant-price	POST	Update product variant pricing
/api/admin/promotions/coupons	CRUD	Create, list, and delete coupons
/api/admin/promotions/orders	GET	Order analytics for promotion tracking

10.3 Admin Authentication

- Protected via Clerk middleware — requires valid session
- Additional admin role check via admin-auth.ts
- Admin context provider (admin-context.tsx) for role-based state

11. Email System

11.1 Provider: Resend

Email Type	Trigger	Content
Order Confirmation	After payment verified	Order ID, items with images, total, shipping address, payment ID
Shipping Notification	When shipment created	Tracking number, carrier (Delhivery), tracking link
Delivery Confirmation	On successful delivery	Order ID and delivery confirmation
Contact Form	Via EmailJS on /contact	User enquiry details to internal team

11.2 Email Specifications

- Branded HTML email templates with Solitario branding
- Product images embedded in order confirmation emails
- Responsive email design for mobile and desktop clients
- From address: noreply@thesolitario.com (via Resend)

12. Analytics & Tracking

12.1 Unified Analytics Events

A single unified analytics module (lib/unified-analytics.ts) fires events to all platforms simultaneously:

Event	GA4 Event	Meta Pixel	Google Ads
Product View	view_item	ViewContent	—
Add to Cart	add_to_cart	AddToCart	—
Search	search	Search	—
Add to Wishlist	add_to_wishlist	AddToWishlist	—
Begin Checkout	begin_checkout	InitiateCheckout	begin_checkout
Add Payment Info	add_payment_info	AddPaymentInfo	add_payment_info
Purchase	purchase	Purchase	conversion
Lead Generation	generate_lead	Lead	generate_lead
Registration	sign_up	CompleteRegistration	sign_up

12.2 Additional Tracking

Tool	Purpose
PostHog	Product analytics, user behavior tracking, feature flags
Vercel Speed Insights	Core Web Vitals and page load performance monitoring
Google Tag Manager (GTM)	Tag management and conversion tracking coordination

13. SEO & Structured Data

Feature	Details
Dynamic Meta Tags	Per-page <title> and <meta description> generation
JSON-LD Schema	Product structured data on PDP via ProductJsonLd component
Sitemap	Dynamic sitemap.ts with all products, categories, and pages
Robots.txt	Dynamic robots.ts configuration
Canonical URLs	Proper canonical tags to prevent duplicate content
OpenGraph / Twitter	Social sharing metadata for all key pages
Breadcrumbs	Schema-compliant breadcrumb navigation
Heading Hierarchy	Single <h1> per page, proper <h2>–<h6> nesting
Semantic HTML	Proper use of <section>, <article>, <nav> elements

14. AI & Chatbot

14.1 Provider: Google Gemini

Feature	Details
AI Chatbot	Conversational product assistant for customer queries
Brand-Consistent Prompts	Pre-built brand guidelines for colors, mood, and style
Image Generation	Imagen 4 / Gemini multimodal for brand asset creation
AI Search	/ai-search route — AI-powered product discovery

14.2 Brand Guidelines (Embedded in AI)

> *Colors: Classic Green #146552, Bronze Gold #AC884B, Ivory Pearl #F8EEE7 | Style: Soft warm lighting, professional studio, golden hour | Mood: Sophisticated, premium, timeless elegance*

15. Store Locator

Feature	Details
Store Data	32KB+ comprehensive store data (lib/stores-data.ts)
Map Integration	Google Maps embedded maps for each store
City-Based Search	Browse stores by city
Get Directions	Static maps with Google Maps direction links
Store Details	Address, phone, operating hours, images
Nearest Stores	Location-based proximity sorting
Radar Client	lib/radar-client.ts for geolocation features

16. Warner Bros Collectibles

Feature	Details
Theme	Dark cinematic UI — #0A0A0A background, #C6A664 gold accent
Hero Banners	4 rotating banners — desktop (DC Web Banner 01-04.jpg) + mobile (DC Mobile Banner 01-04.jpg)
Brand Filters	DC Comics + Tom & Jerry with logo buttons for quick filtering
Tag Matching	Multi-variant tag matching — dc, dc-comics, batman, tom&jerry, etc.
Product Source	Shopify collection 'warnerbros'
Floating Button	Persistent floating WB button alternating DC / Tom & Jerry logos
Config	lib/warner-bros-config.ts — centralized config for hero, brands, and theme

17. Performance & Caching

Feature	Implementation
React Query	Global query client with 5-min staleTime, 30-min gcTime
Shared Cache Keys	Shop and category pages share ['products'] cache for instant back-navigation
ISR	Incremental Static Regeneration for product detail pages
Image Optimization	Next.js <Image> with priority, quality, and sizes attributes
WebP Images	Category banners served in .webp format
Lazy Loading	IntersectionObserver for infinite scroll product batches
Lenis Smooth Scroll	Desktop-only smooth scrolling via Lenis library
Speed Insights	Vercel Speed Insights for Core Web Vitals tracking
Rate Limiting	Upstash (Redis)-based API rate limiting
API Timeout	AbortController with 5s timeout for non-critical API calls
View Transitions	experimental.viewTransition: true in Next.js config

18. Database & Storage

18.1 JSON File Storage (lib/db/)

Entity	File	Key Fields
Users	data/users.json	id, clerk_user_id, shopify_customer_id, created_at
Orders	data/orders.json	id, clerk_user_id, subtotal, discount, total, status (PENDING/PAID/FAILED), razorpay_order_id
Coupons	data/coupons.json	id, clerk_user_id, code, percent_off, status (ACTIVE/REDEEMED/EXPIRED), expires_at

18.2 Repository Layer

- UserRepository — find, create, upsert by Clerk user ID
- OrderRepository — CRUD, find by Razorpay ID, count paid orders
- CouponRepository — validate, redeem, generate codes, enforce monthly limits

18.3 External Data Sources

- Shopify — products, collections, cart, customers, discount codes
- Supabase — additional persistence layer for extended data
- SessionStorage — client-side scroll positions and navigation flags

19. Security & Middleware

Feature	Implementation
Clerk Middleware	Route protection for /account/*, /admin/*, /wishlist/*
HMAC Signature Verification	Razorpay payment verification using SHA256
Input Sanitization	lib/sanitize.ts — XSS prevention
Input Validation	lib/validations.ts — form and API input validation
Rate Limiting	Upstash (Redis)-based API rate limiting
API Error Handling	Standardized error responses via lib/api-error.ts
Content Security Policy	CSP headers for Cloudflare Turnstile integration
Webhook Verification	Shopify webhook HMAC validation
Feature Flags	lib/feature-flags.ts for controlled feature rollouts

20. Third-Party Integrations Summary

Service	Purpose	Config Location
Shopify	Headless commerce — products, cart, customers, orders	lib/shopify.ts
Clerk	Authentication and user management	middleware.ts, lib/auth.ts
Razorpay	Payment processing	lib/razorpay.ts
Delhivery	Shipping and logistics	lib/delhivery.ts
Resend	Transactional email	lib/email.ts
Google Analytics	Web analytics	components/analytics/GoogleAnalytics.tsx
Meta Pixel	Facebook conversion tracking	components/analytics/MetaPixel.tsx
Google Ads	Ad conversion tracking	Via GTM / gtag
PostHog	Product analytics	lib/posthog.tsx
Google Gemini	AI chatbot and image generation	lib/gemini.ts
Vercel	Hosting, previews, CI/CD	next.config.js
EmailJS	Contact form emails	Contact page component
Upstash	Rate limiting (Redis)	lib/rate-limit.ts
Supabase	Database persistence	lib/db/
Radar	Geolocation features	lib/radar-client.ts
Lenis	Smooth scrolling (desktop)	components/ui/SmoothScrollDesktop.tsx

21. API Routes Reference

21.1 Products

Route	Method	Description
/api/products	GET	All products (optional ?collection= filter)
/api/products/[handle]	GET	Single product by handle
/api/products/by-handles	POST	Batch fetch products by handles
/api/products/gift	GET	Gift product info for promotions
/api/pricing	GET	Real-time pricing from Shopify
/api/recommendations	GET	AI-powered product recommendations

21.2 Authentication

Route	Method	Description
/api/auth/[...nextauth]	ALL	NextAuth handler (Google + Credentials)
/api/auth/signup	POST	Email signup with Shopify customer creation
/api/auth/otp	POST	OTP-based verification
/api/auth/forgot-password	POST	Password reset flow

21.3 Account

Route	Method	Description
/api/account/profile	GET/PUT	User profile management
/api/account/addresses	CRUD	Address management
/api/account/orders	GET	Order history
/api/account/upload-avatar	POST	Avatar image upload

21.4 Payments

Route	Method	Description
/api/razorpay/create-order	POST	Create Razorpay payment order
/api/razorpay/verify-payment	POST	Verify payment signature
/api/razorpay/webhook	POST	Payment event webhooks
/api/submit-order	POST	Final order submission after payment

21.5 Shipping

Route	Method	Description
/api/shipping/create-order	POST	Create Delhivery shipment
/api/shipping/track	GET	Track shipment by waybill
/api/shipping/check-pincode	GET	Pincode serviceability and ETA
/api/shipping/warehouses	GET	Warehouse information
/api/pincode	GET	Pincode delivery check

21.6 Coupons & Promotions

Route	Method	Description
/api/coupons	GET	List coupons for current user
/api/coupons/validate	POST	Validate coupon code
/api/admin/promotions/coupons	CRUD	Admin coupon management
/api/admin/promotions/orders	GET	Order analytics for promotions

21.7 Webhooks & Other

Route	Method	Description
/api/webhooks/clerk	POST	Clerk auth events (user creation, updates)
/api/webhooks/shopify	POST	Shopify order and fulfillment events
/api/contact	POST	Contact form submission
/api/dynamic-content	GET	Shopify metaobject content
/api/pdf	GET	PDF generation
/api/mcp	—	MCP server endpoints

Summary

Frontend Pages	**20+**
API Routes	**40+**
Third-Party Integrations	**16**
Products in Catalog	**220+**

Full e-commerce pipeline: Browsing → Cart → Payment → Shipping → Delivery
